

Terufusion[®] **STRACK** Dynamic

**Stack and
RACK to any
configuration
your hospital
needs**

We keep life flowing

Security and flexibility

A robust construction guarantees a secure pump connection and gives total flexibility: pumps can be easily removed or added.

Stability

The gravity center of the STRACK Dynamic is very close to the pole which gives it the best stability and assures easy transport.

Lightweighted

The separate modules and the absence of an additional back wall make the STRACK Dynamic a lightweight modular system. The weight only depends on the number of modules and pumps, both having a minimal weight.

Compatibility

The system can be used in every ward: basic pump modules and specialised modules for TCI or TIVA can easily be combined.

User-friendly

The available double clamp system makes it possible to easily switch the modules between different poles without having to transport them manually.

Versatility

If you need to use the pump on its own, the appropriate pole clamps (fixed / rotatable) can be used with the same click-in ease.

Also available

STRACK Intense

STRACK & Go

Strack modules - Specifications

Compatible Pumps*
TE-331, TE-332, TE*371, TE*372
Power Distribution
100 - 240 VAC (I/O)
